### Identical sleeves

To obtain two identical sleeves, all you need to do is to knit them at the same time on the same needle. Cast on each sleeve separately, using two balls of yarn and work the increases and decreases simultaneously.

This child's jersey is ideal for this method, two sleeves on one needle will not be too heavy to knit, and it will ensure that the coloured stripes are exactly the same distance apart.

## KNIT TIP

### Substituting another cable pattern

To ring the changes try using another  
cable pattern from the Stitch Pattern  
library up the front of this attractive  
jersey. To fit without altering the pattern  
the cable should be worked over the  
same number or slightly fewer stitches.  
This cable pattern is worked over 28 sts.  
If you are using a pattern with fewer  
stitches, add sufficient reversed st st at  
each end to make up the total

### Plaited cable

This cable is much simpler than the one  
featured in the pattern as there are fewer  
rows to remember. Knit up a stitch  
sample of the cable using the centre  
28 sts to see what it looks like.

### Special abbreviations

**C6B** Cable 6 back as follows: sl next  
3 sts on to cable needle and leave at  
back of work, k3, k3 from cable needle

**C6F** Cable 6 front as follows: sl next 3 sts  
on to cable needle and leave at front, k3,  
k3 from cable needle
