

# EX-SYDIODA

Presentation Overwatch Team

Prepared for:  
Luminosity Gaming

Proposal issued:  
08 February 2017

Firstly

# THANK YOU

for considering us!

Hi!

EX-Sydioda is an all-French team made of the crème de la crème of Melty Esport Club and Vitality Overwatch teams

The team might appear young but don't be fooled. Being the merge of the best elements of two teams including the oldest one in the game, it is already a strong contender among the top European teams. And that's just the beginning.

We feel that our journey to the top requires the kind of ressources that only a well established and ressourceful organization like yours could provide

We hope that this presentation will give you a good idea of what we can do and want to accomplish under your name.

## WHY OVERWATCH?

The next major esports fps is not coming. It's already there.

Never in esports history has a game been pushed so much from the beginning by its publisher to become a dominant esports title. Major actors from all over the world have already jumped on the bandwagon.

Sponsors trust the Blizzard well-oiled machine and are asking for Overwatch-related content and partnerships. We've already done some contracted work ourselves for brands such as NVIDIA or ESL.

## SOME FACTS

20+ millions of copies sold in less than 6 months.

---

A steady spot at the top of most viewed games on twitch. Whether is for esports or entertainment, there are always some nice streams to watch on Overwatch.

---

Tournaments every week. Literally. You want esports? You get esports. Simple.

## THERE'S MORE

The Korean esports scene's seal of approval. Or why Dota and CS:GO are jealous.

---

Broadcasted on TV! No game made it so quickly to the TV yet. The game was clearly designed to entertain all kinds of audiences.

---

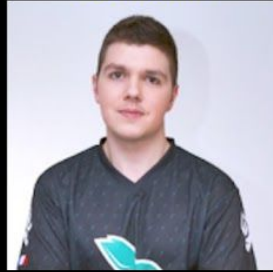

The Overwatch League Soon!  
The game-changer that everyone in the industry has been waiting for.

## IT'S MORE THAN JUST A "LIKE"

We fully understand the reality of today's esports market. We are competitors first. 10 years ago this section would have ended right here. Today however it's another story. We understand the esports reality. We're at a time when building your fanbase, providing entertainment through many medias has become crucial.

We embrace that.

## WHAT WE BRING TO THE TABLE

---

### 7 HIGH-SKILLED INDIVIDUALS

We didn't get where we are by accident. We'll keep working as much as it takes to get where we want to go.

---

### EXPERIENCE

This team was built to perform and last through the ever-evolving metas of Overwatch. Each player brings some versatility to the group.

---

### VISIBILITY

Unlike most other teams, not only will we draw fans from all over the world, but many French people will instantly root for us and for you.

## WHAT MORE

---

### A GREAT MORALE

There's already a heavy bond between the players and a strong will to compete as the best team. This is something that some teams never manage to achieve. We already did.

---

### COMMITMENT

Whether it is through social medias, promotion of your brand or our names, we're ready to be fully committed and play our part outside of the game.

## AND THAT'S IT

---

The already established powerhouses of the game are in our sight. And we in theirs.

We know we have what it takes to make it to the big stages, and we keep proving it with every tournament we enter. We also realise that we need to surround ourselves with the right people and resources to compete at the very top.

We believe that you could fit that profile and we would be delighted to have a chat with you to discuss things further.
