

1. Download and unpack the .rar file. There are 3 files inside.

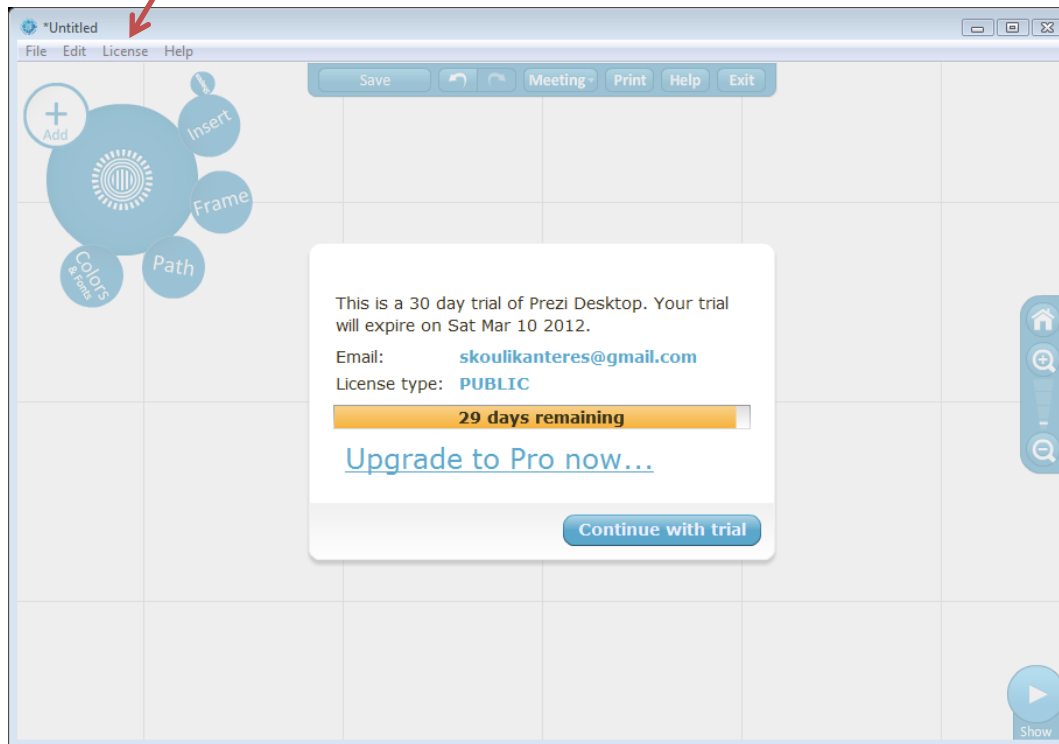

2. Install **Adobe Air** if you don't have it.

3. Go to www.prezi.com and create a **FREE** account.

4. Install **PreziDesktop_3.056.air**.

The software will notify you of an update. Update it, and then the software restarts. On welcome screen, fill in the **e-mail** and **password** you used to sign up to **prezi.com**.

5. Go to **License>License Info** and see that you have 29 days to use (this is a trial)

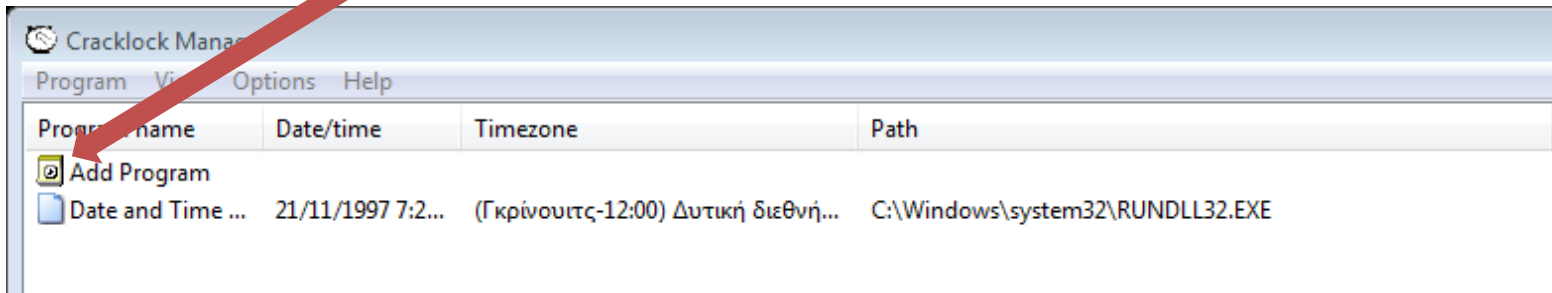

6. Install **Cracklock**

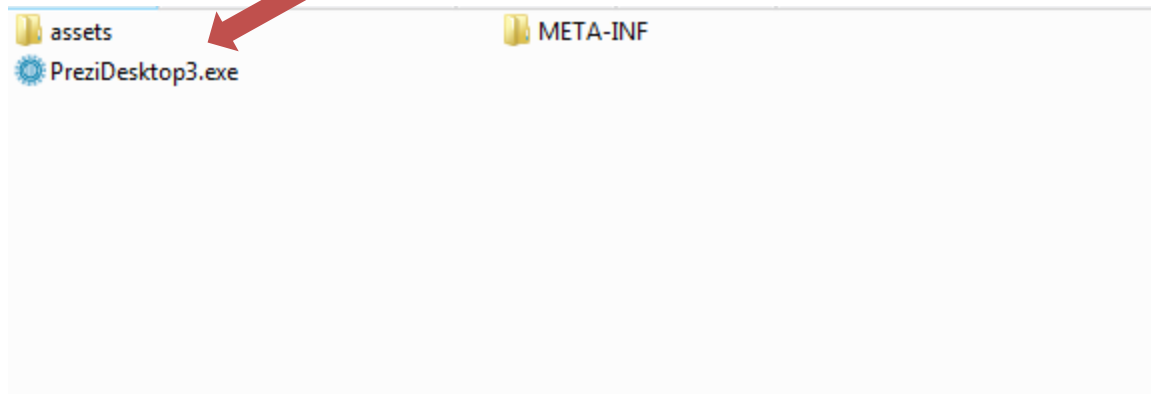

Run **Cracklock** from **Start Menu**.

RUN AS ADMINISTRATOR, OR IT WILL NOT WORK

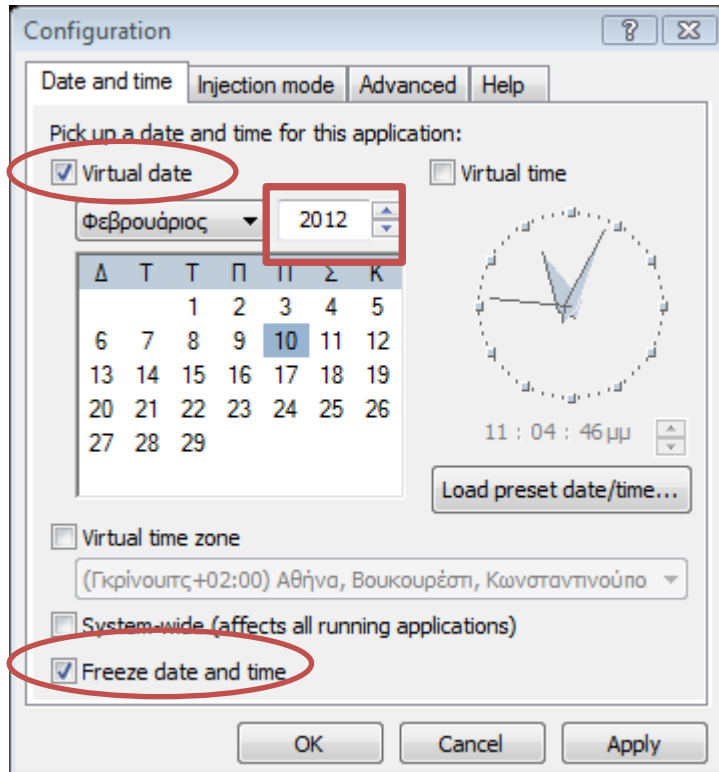

7. Click on **Add Program**.

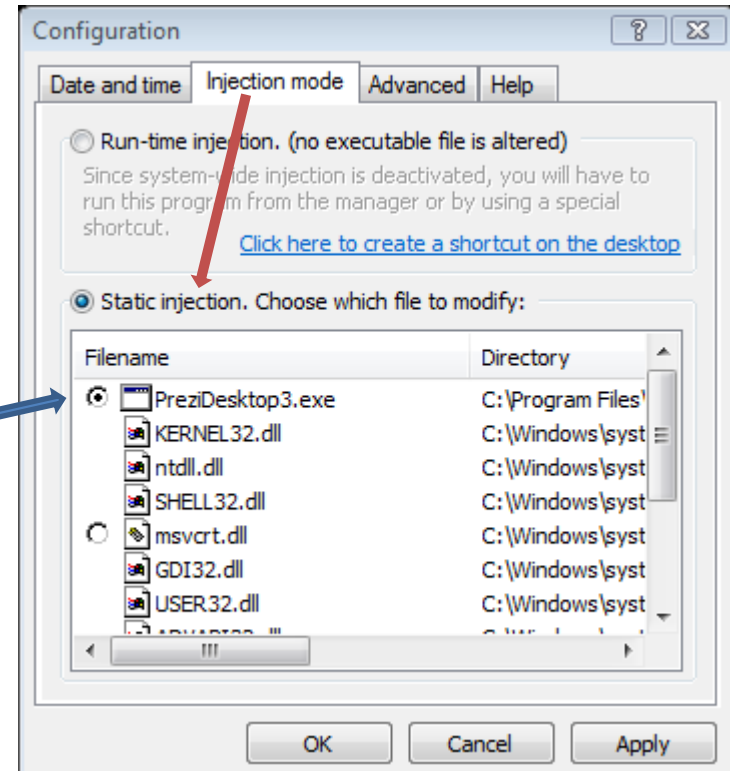

8. Find the **PreziDesktop3.exe** file (in *Program Files>PreziDesktop3>PreziDesktop3.exe*) and press open.

9. A window opens, like the windows time with a clock. On Date and Time tag, tick on **Virtual Date**, **Freeze date and time**, and roll the year from 2012 back to **2003**

10. Click on the Injection mode tab, and select **Static Injection**.

Make sure the **PreziDesktop3.exe** is selected, and press OK.

DONE!!

If you open now the prezi application and go to **License>Your License Info** you'll see that you have some thousand days until expiration.

P.S. Your pc clock is not affected. Only the app's "internal clock" is.
