

ORBITAL DUST

Psychedelic Stoner Doom

PIERRE guitar / vocals

NOÉ bass / vocals

RÉMI drums / vocals

The band was born in 2014 in Poitiers, France, under the name Mantras. After an EP released in 2016, contributions to a few compilations and quite a few concerts across France and neighbouring countries, they decided to change their name to **Orbital Dust** when bass player Noé joined the band. In 2025, the band recorded its first album, named Mantras as a tribute to their early years.

Mostly keen on heavy, ambient sounds, the trio delivers long, psychedelic songs borrowing from **Stoner, Doom**, sometimes **Prog** and **Post Rock**, spacelike saturated sonorities filled with delay and reverb.

An invitation to let yourself be carried away by ambient drones as well as heavy, asymmetrical rhythms.
