FOREWORD

Mr. Lee Keen Whye
Chairman, Asian Television Awards

I would like to warmly welcome you to the 26th iteration of the Asian Television Awards.

In the past year, the industry has navigated through difficult times brought on by the COVID-19 pandemic. Despite the challenges, our industry has been more resilient than ever. For us at the Asian Television Awards, we have successfully mounted the Awards show virtually for first time in 2020 and now again in 2021. This move to the virtual space has allowed us not just host in one country but several Asian countries, giving us better diversity and wider reach.

This year, I'm happy to announce that we've reached several milestones — the addition of digital categories that recognize the steady growth of OTT in Asia and a 37% increase in entries received this year.

Apart from this, the Asian Television Awards has been evolving with the times. In May, we announced Facebook as our official industry partner, allowing us to mount dedicated live interviews only available on FB Watch. In addition, we have also maximized various platforms not just on Facebook but on Instagram Live making the Awards more accessible to the younger generation with just a click of a finger.

I would like to take this opportunity to thank the team behind the Asian Television Awards, most importantly the producers and talents behind the entries. I would also like to thank our esteemed industry partners and our distinguished panel of judges for their time and effort. Without you, this Awards show would not have been possible.

Finally, I would like to send my warmest congratulations to all the nominees and winners of the 26th Asian Television Awards!

THE BEAT OF OUR CULTURE

measat

New Horizons

MEASAT provides innovative, cutting-edge solutions in broadcast, telecommunications and satellite broadband.

Soon, the MEASAT fleet will be further strengthened with the addition of MEASAT-3d in 2022 which will provide in-orbit redundancy for MEASAT's fleet of satellites at 91.5°E, with the largest ever broadband capacity over Malaysia from a single satellite.
